Experience

Semantic Arts

Software Developer | November 2019 – Present

- Lead and implemented four major versions of an in-house visualization app called Slow Reveal to present ontologies to business clients.
- Worked closely with ontologist consultants to implement user-requested changes in **NodeJS**, **ReactJS**, and **Redux**.
- Used Slow Reveal to construct **OWL** ontologies to model a clients' business rules and processes.
- Persisted user and app data into graph databases (**Allegrograph**, **Stardog**) using **SPARQL** queries.

Dark Sky Technology

Software Developer | May 2021 – December 2021

- Designed data schemas to best represent the company's data needs, in both **AWS SQL** and **MongoDB** databases.
- Implemented APIs in **Flask** to provide specific use-cases for the client.
- Constructed and maintained a **ReactJS** client to consume in-house APIs.

Molo Lolo Coffee Shop

Barista | May 2019 – March 2020

- Worked closely with fellow baristas to produce quality drinks, quickly.

Skills

- Creating frontend applications with **ReactJS**, **Typescript**, and **Vue**.
- Managing frontend state with **Redux**, **VueX**, and **MobX**.
- Creating APIs using Javascript's **NodeJS**, **Express**, and Python's **Flask**.
- Interfacing with graph databases using **SPARQL** to query data in **RDF** formats.
- Ensuring quality with **Pytest** and **Jest**.

Education

University of Toronto

Honors Bachelor of Science | 2020 - Expected 2024

St. George Campus

GPA: 3.93

Completing a double degree in Mathematics and Computer Science
Taken courses in Software Architecture (CSC207), Digital Logic and Circuits (CSC258), and predicate logic (CSC165, CSC236).
